

Textarea

Erstellt ein Textarea.

Attribut	Typ	Erforderlich	Beschreibung
width	integer	Nein	Breite des Textareas (in px)

Vorschau

Beispiel

QuelltextSmarty Code:

```

1. <form name="extra">
2. <div align="center">
3. <table class="table">
4.   <tr>
5.     <td class="cell">
6.       {input version=5 type="textarea" name="input_textarea" title="Textarea" short="Geben Sie was
ein"}
7.       {input version=5 type="textarea" name="input_textarea_2" title="Textarea" short="Geben Sie
was ein" width=1000}
8.     <br />
9.   </td>
10. </tr>
11. </table>
12. </div>
13. </form>
14. <script language="javascript">
15. {literal}
16. function do_load()
17. {
18. }
19.
20. function do_unload()
21. {
22.   window.parent.unload_extra();
23. }
24. {/literal}
25. </script>

```

```

<form name="extra">
<div align="center">

```

```
<table class="table">
  <tr>
    <td class="cell">
      {input version=5 type="textarea" name="input_textarea" title="Textarea" short="Geben Sie was ein"}
      {input version=5 type="textarea" name="input_textarea_2" title="Textarea" short="Geben Sie was ein"
width=1000}
      <br />
    </td>
  </tr>
</table>
</div>
</form>
<script language="javascript">
{literal}
function do_load()
{
}

function do_unload()
{
  window.parent.unload_extra();
}
{/literal}
</script>
```
